RAIN FORESTS

Rain forests are important places. They get about 400 inches of rain a year and the temperature rarely falls below 80° Fahrenheit. An acre may contain over 80 different kinds of plants and trees, some of which are not found anywhere else! These plants provide housing and food for many species of animals. In fact, of the five million separate kinds of life on Earth, over half can be found in the rain forests, and these are just the ones we know about. Imagine how much more there is to be discovered in the rain forests!

EDITOR'S NOTEBOOK

Dear Archie Readers,

Here's an upcoming event which unfortunately most of you will not be able to attend. But here it is anyway, for the lucky ones who can.

FILMART'S CARTOON WORLD GALLERY in Huntington, New York will kick off a week-long celebration of **ARCHIE COMICS** beginning Saturday and Sunday, September 16th and 17th, 1995. Featured will be classic Archie comic art, memorabilia and animation cels.

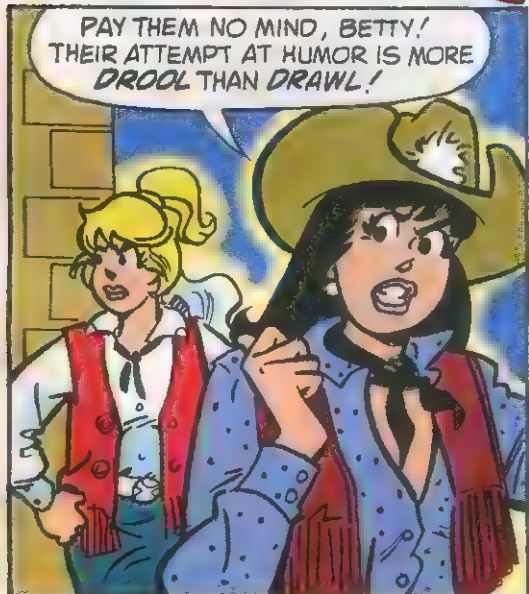

The big bonus will be personal appearances by legendary Archie artists Dan DeCarlo, Stan Goldberg and Joe Edwards. It's also very possible that less legends such as Yours Truly might be there, along with some other surprise guests.

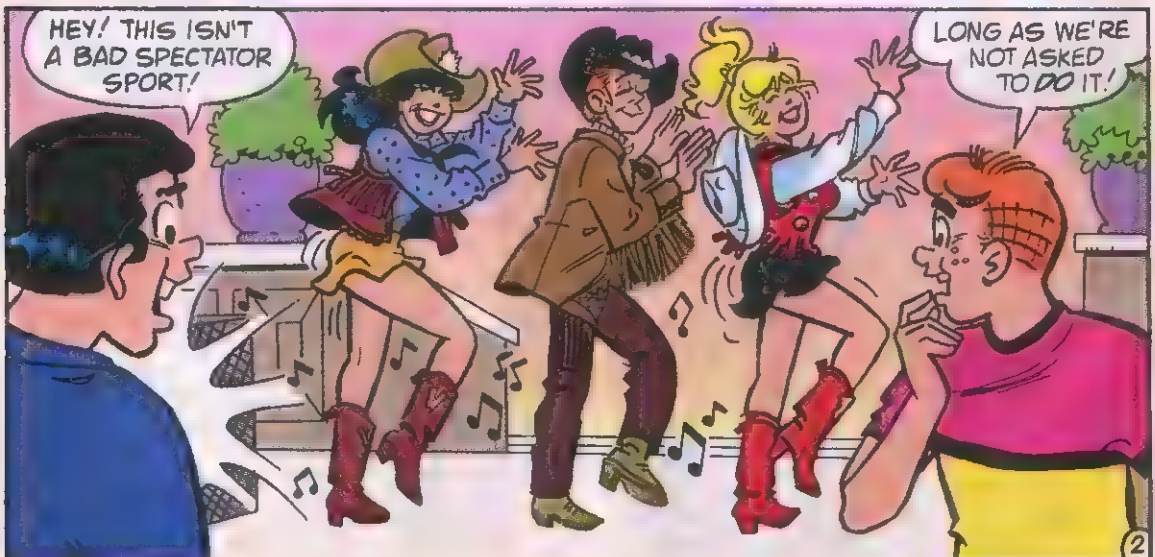

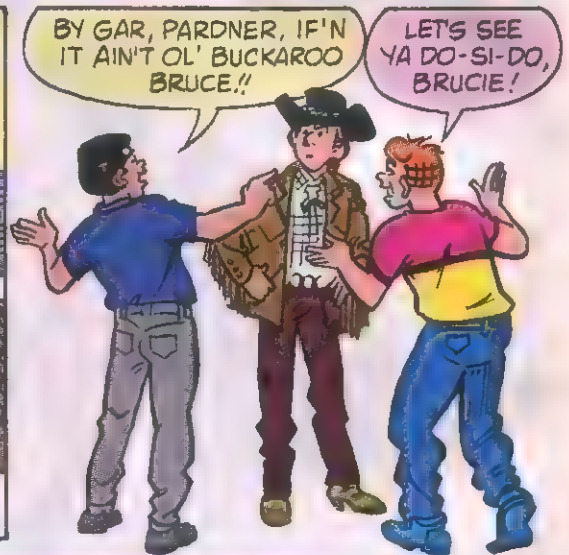

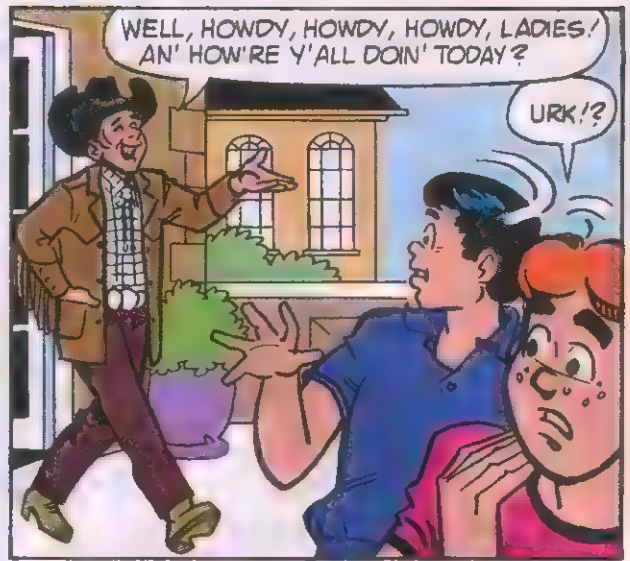

For more information and times call 1-800-ART-CELS.

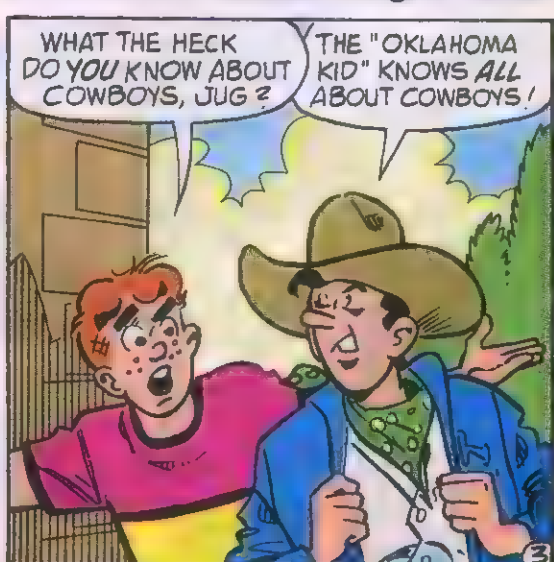

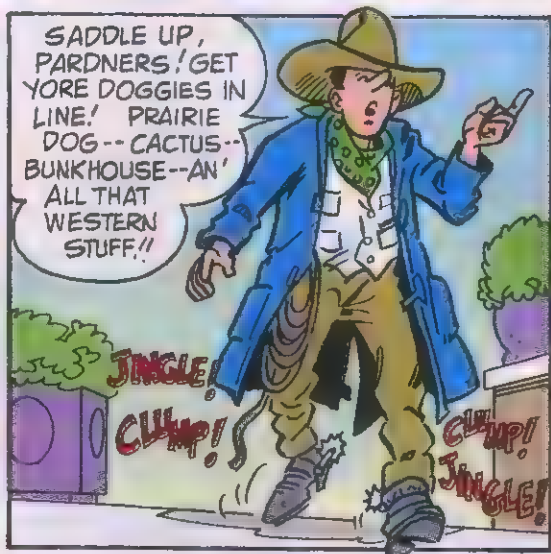

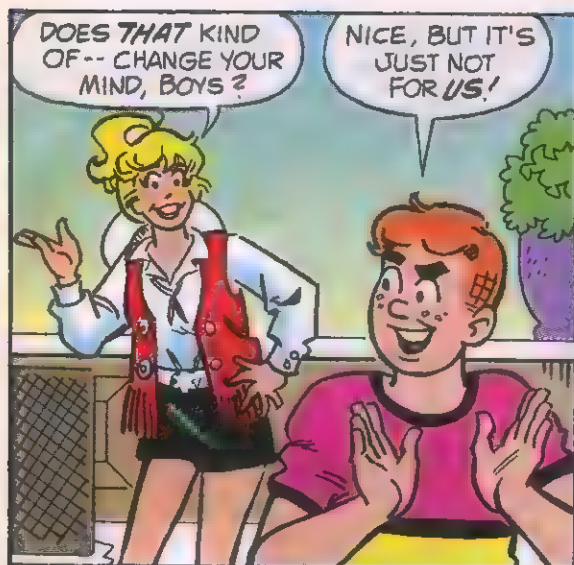

If you missed this column last month, or if you forgot, here's a reminder. Archie Comics will be paying cash prizes for the best reports submitted, entitled "My Summer Vacation." Winning reports will appear on Archie Club pages in upcoming issues. First prize will be \$15.00.
